

The Los Angeles Department of Water and Power (LADWP) will begin construction to replace a water pipeline currently located under Century Blvd. The current pipeline was installed in 1937 and is operating past its useful service life. The new pipeline will be located primarily on 98th Street.

Construction will begin in February 2020 and will be completed by mid-2021. To reduce the impact to the community, construction will be divided into multiple stages, starting with Construction Sequence 1 below.

98th Street will be converted to a one-way street.

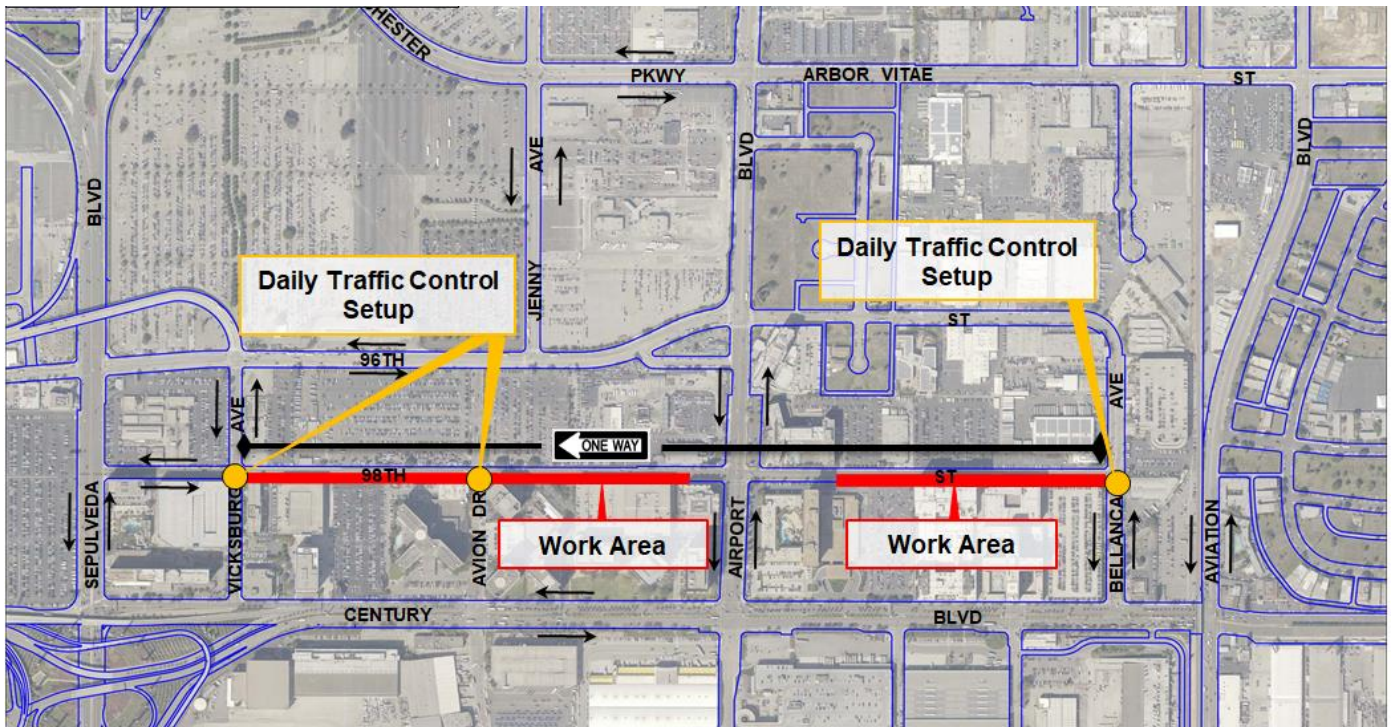

- The east bound lane(s) between Vicksburg Ave. and Bellanca Ave. will be closed to traffic.
- Traffic will be reduced to one lane in the westbound direction.
- Lanes will be re-striped.
- Parking will be restricted during construction.

- Temporary No Parking/Tow-Away signs will be posted as needed.
- Driveways will remain open at all times, except when construction is occurring at the specific driveway location.
- For properties with multiple driveways, only one driveway may be closed at a time.
- Consult with On-site Construction Manager Kevin Del Toro (contact info below) to coordinate deliveries and other business needs.

When work approaches the intersections of 98th St. and **Vickburg Ave, Avion Dr. and Bellanca Ave.**, temporary traffic control measures will be implemented. This may include:

- Reduced lanes of traffic
- Limited turn access
- At the end of each work day, traffic control measures will be removed

Construction Sequence 1: February 2020 – May 2020
