

Title: VENICE DUAL FORCE MAIN	Item No. __8.2.1__
Meeting date:	
Agendized by: C Hench	
Contact person:	Phone number:
Committee Vote (if appropriate):	
Does this item have a fiscal impact on the Neighborhood Council? ____ Yes <input checked="" type="checkbox"/> No	
Additional documents attached? ____ Yes <input checked="" type="checkbox"/> No	

RECOMMENDATION: This item has been agendized at the request of **Dr. Jan Green Rebstock**, Environmental Supervisor, for City of Los Angeles, Bureau of Engineering, and has not been heard by a committee due to the timing of the request. Therefore there is no recommendation on this item.

BACKGROUND/DISCUSSION: Regarding the construction of the Venice Dual Force Main Sewer Project on Pacific Avenue in Playa del Rey, there is a proposal to have construction working hours from 7am to 7pm within the City jurisdiction (south of the Channel and Ballona Creek) versus the permitted working hours of 8am - 5pm north of the Channel (as we expect the LA County CDP permit restrictions to stipulate for the Marina del Rey portion of the project). The rationale for having the option for extended work hours along Pacific Avenue and Vista del Mar is to accelerate the speed of construction activities and reduce the duration of traffic controls needed in the area. The Project Manager is interested in discussing this possibility with area residents and the council office suggested that it would be a good idea. We don't want City of LA residents to feel that their quality of life is not valued as much as County of LA residents (i.e. enduring noise from construction activities later into the afternoon/evening). This inconvenience might be worth it if it allows the contractor to finish work in the area much quicker.

FISCAL ANALYSIS: none

ATTACHMENTS: none

MOTION:

Possible motion to accept or reject the planned extension of hours of construction from the permitted working hours of 8am-5pm to 7am-7pm on Pacific Avenue in Playa del Rey, south of the Channel and Ballona Creek.
