Thank you Lisa. Can you please let me know what is an "interpretive panel" as I know I will be asked the question?

My Adobe program has some of those odd glitches too!

Thank you.

Best,
Theresa Torrance

Yes, of course.

We have beautiful interpretive panels that were installed in 2011 by K2, designed by Sussman Prejza. After 12 years some have shown weather-wear, so we got a bid to replace them. Attached are some photos and documents illustrating the issue.

Please let me know if you need any additional information.

Thank you again for considering this request!

Hi Theresa,

I have prepared the attached outlining how many panel graphics (with a few photo examples) need to be replaced (7 out of 14 panels), and accompanying that PDF is the estimate from K2 Design and Fabrication.

It's hard to parse out exactly how much each panel will cost, but if we divide the estimate (\$13,000) by 7, that would average about \$1,857 per panel.

Please note, we are asking a little less than half of the cost, \$5,000, from the Neighborhood Council, and we have other matching grants that will cover the rest of the funding required.

I will make copies for you today and put them in a manilla envelope and drop them into your garage mailbox:

7909 W. 81st Street

Playa del Rey

Thank you!

Lisa
